

RESTRAINED SPRING MOUNTS

(SMR-4-100 and 200 Series - 1" and 2" Deflection)

SMR-4 series are Restrained Spring Mounts with Restricto assembly that limits vertical movement due to reduced loads or external forces (wind loads). These mounts are more suitable and effective when used for equipment with significant variations in installed weight and operating weight and equipments mounted on roofs.

SMR-4 series spring mounts are unboxed laterally stable steel springs welded to top and bottom steel plates.

Isolator Series		100	200
A	in	4-7/8	6-1/4
B	in	2-1/2	3-7/8

APPLICATIONS:

- Cooling Towers
- Air Handling Units
- Chillers
- Condensing Units
- Boilers

FEATURES:

- Mounting holes are standard
- Lower Steel Plate: Neoprene acoustical friction pad
- Upper Load Plate: Leveling Bolt Assembly
- Spring: Hot Dip Galvanized
